Figure 1. Western blot

Control and treatment protein bands; loading bands

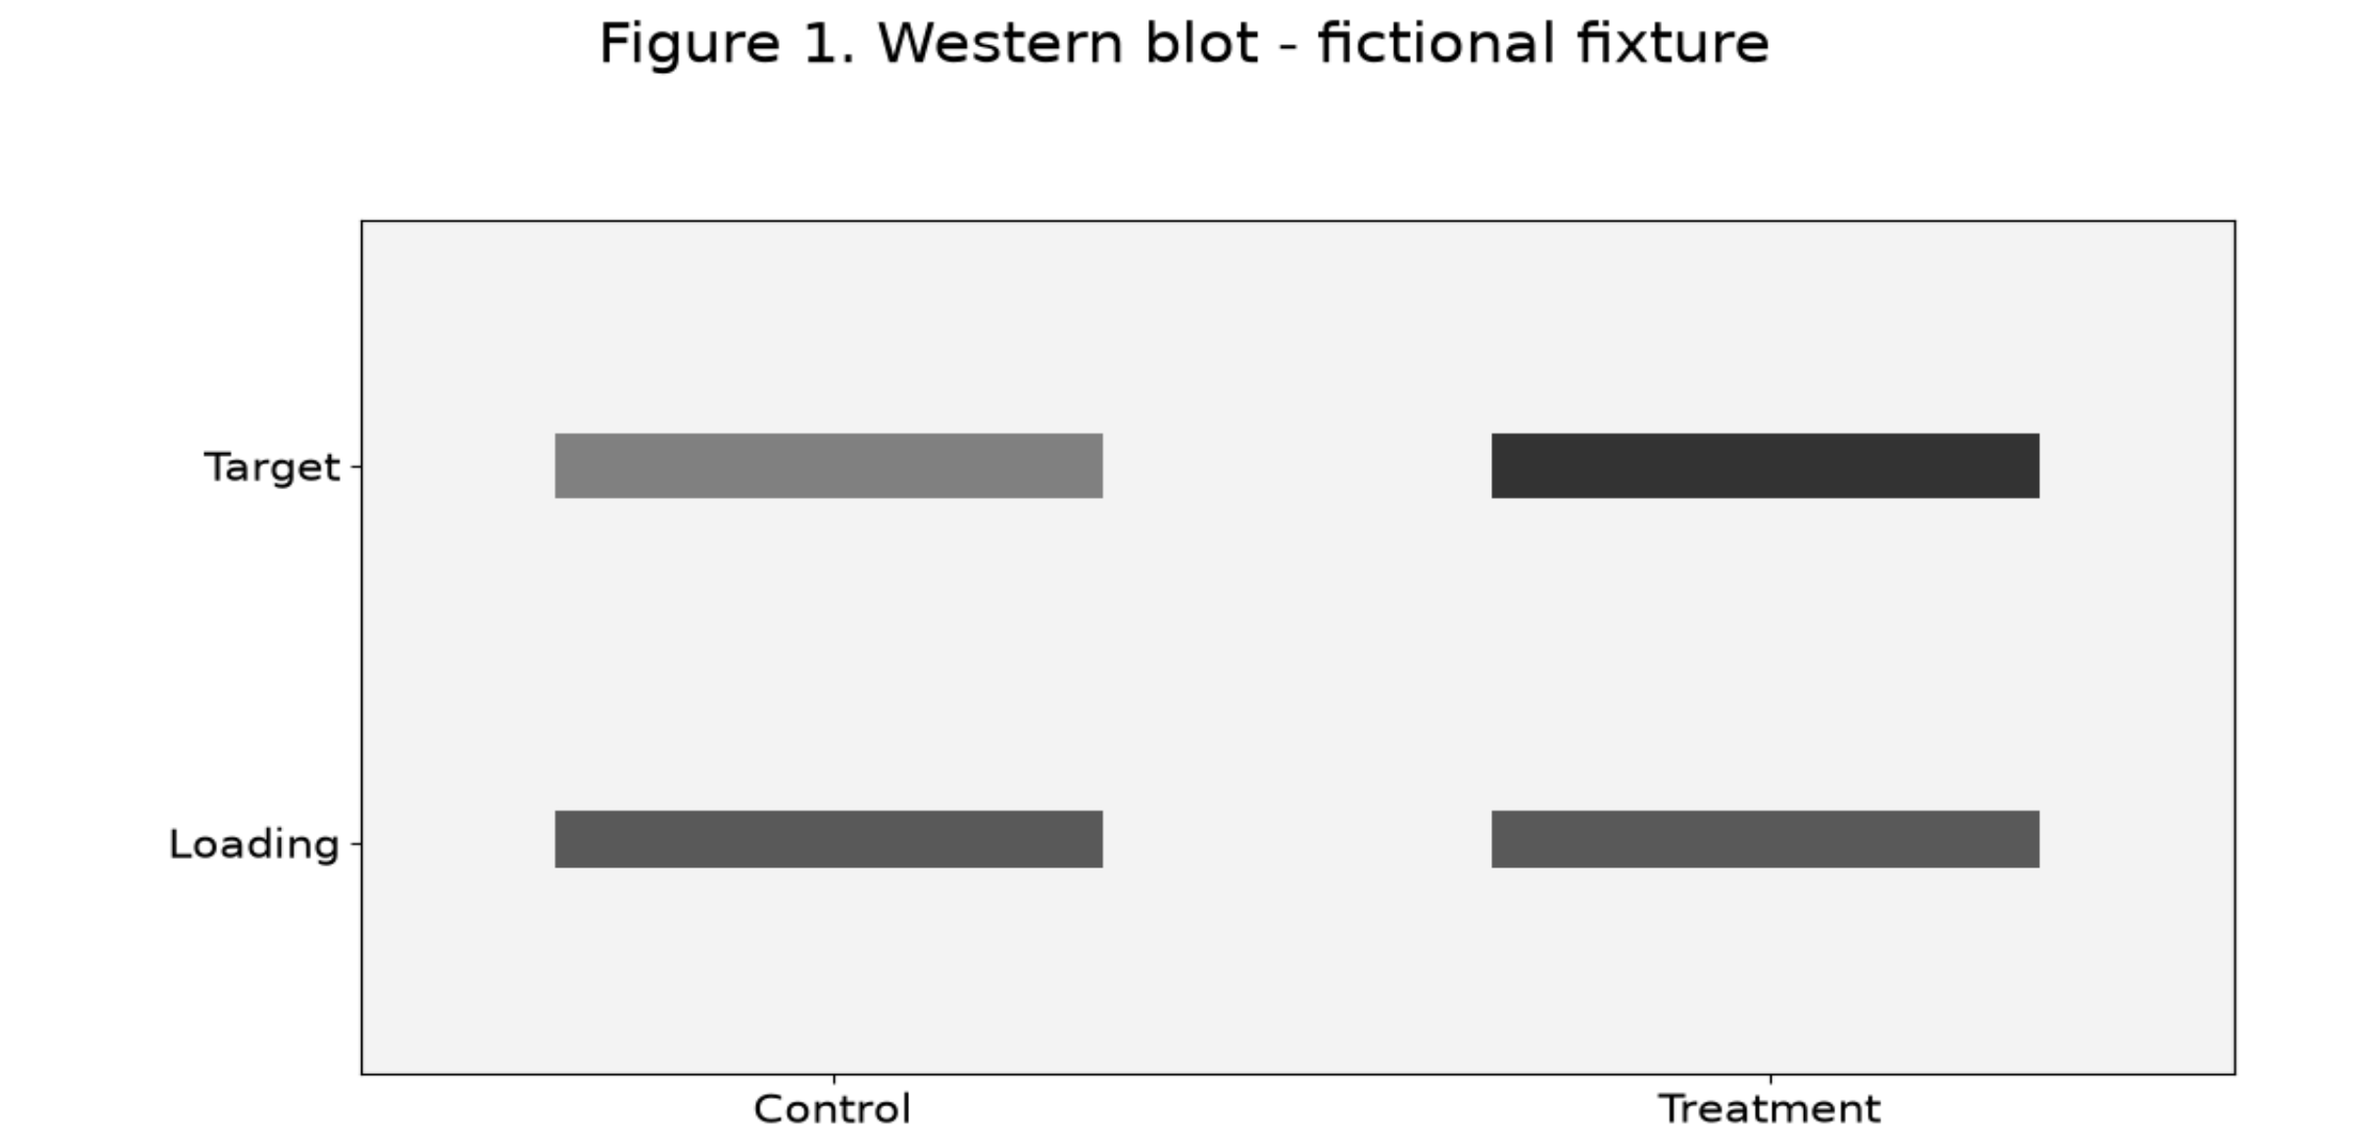

Figure 2. Flow cytometry

Control and treatment fluorescence channels

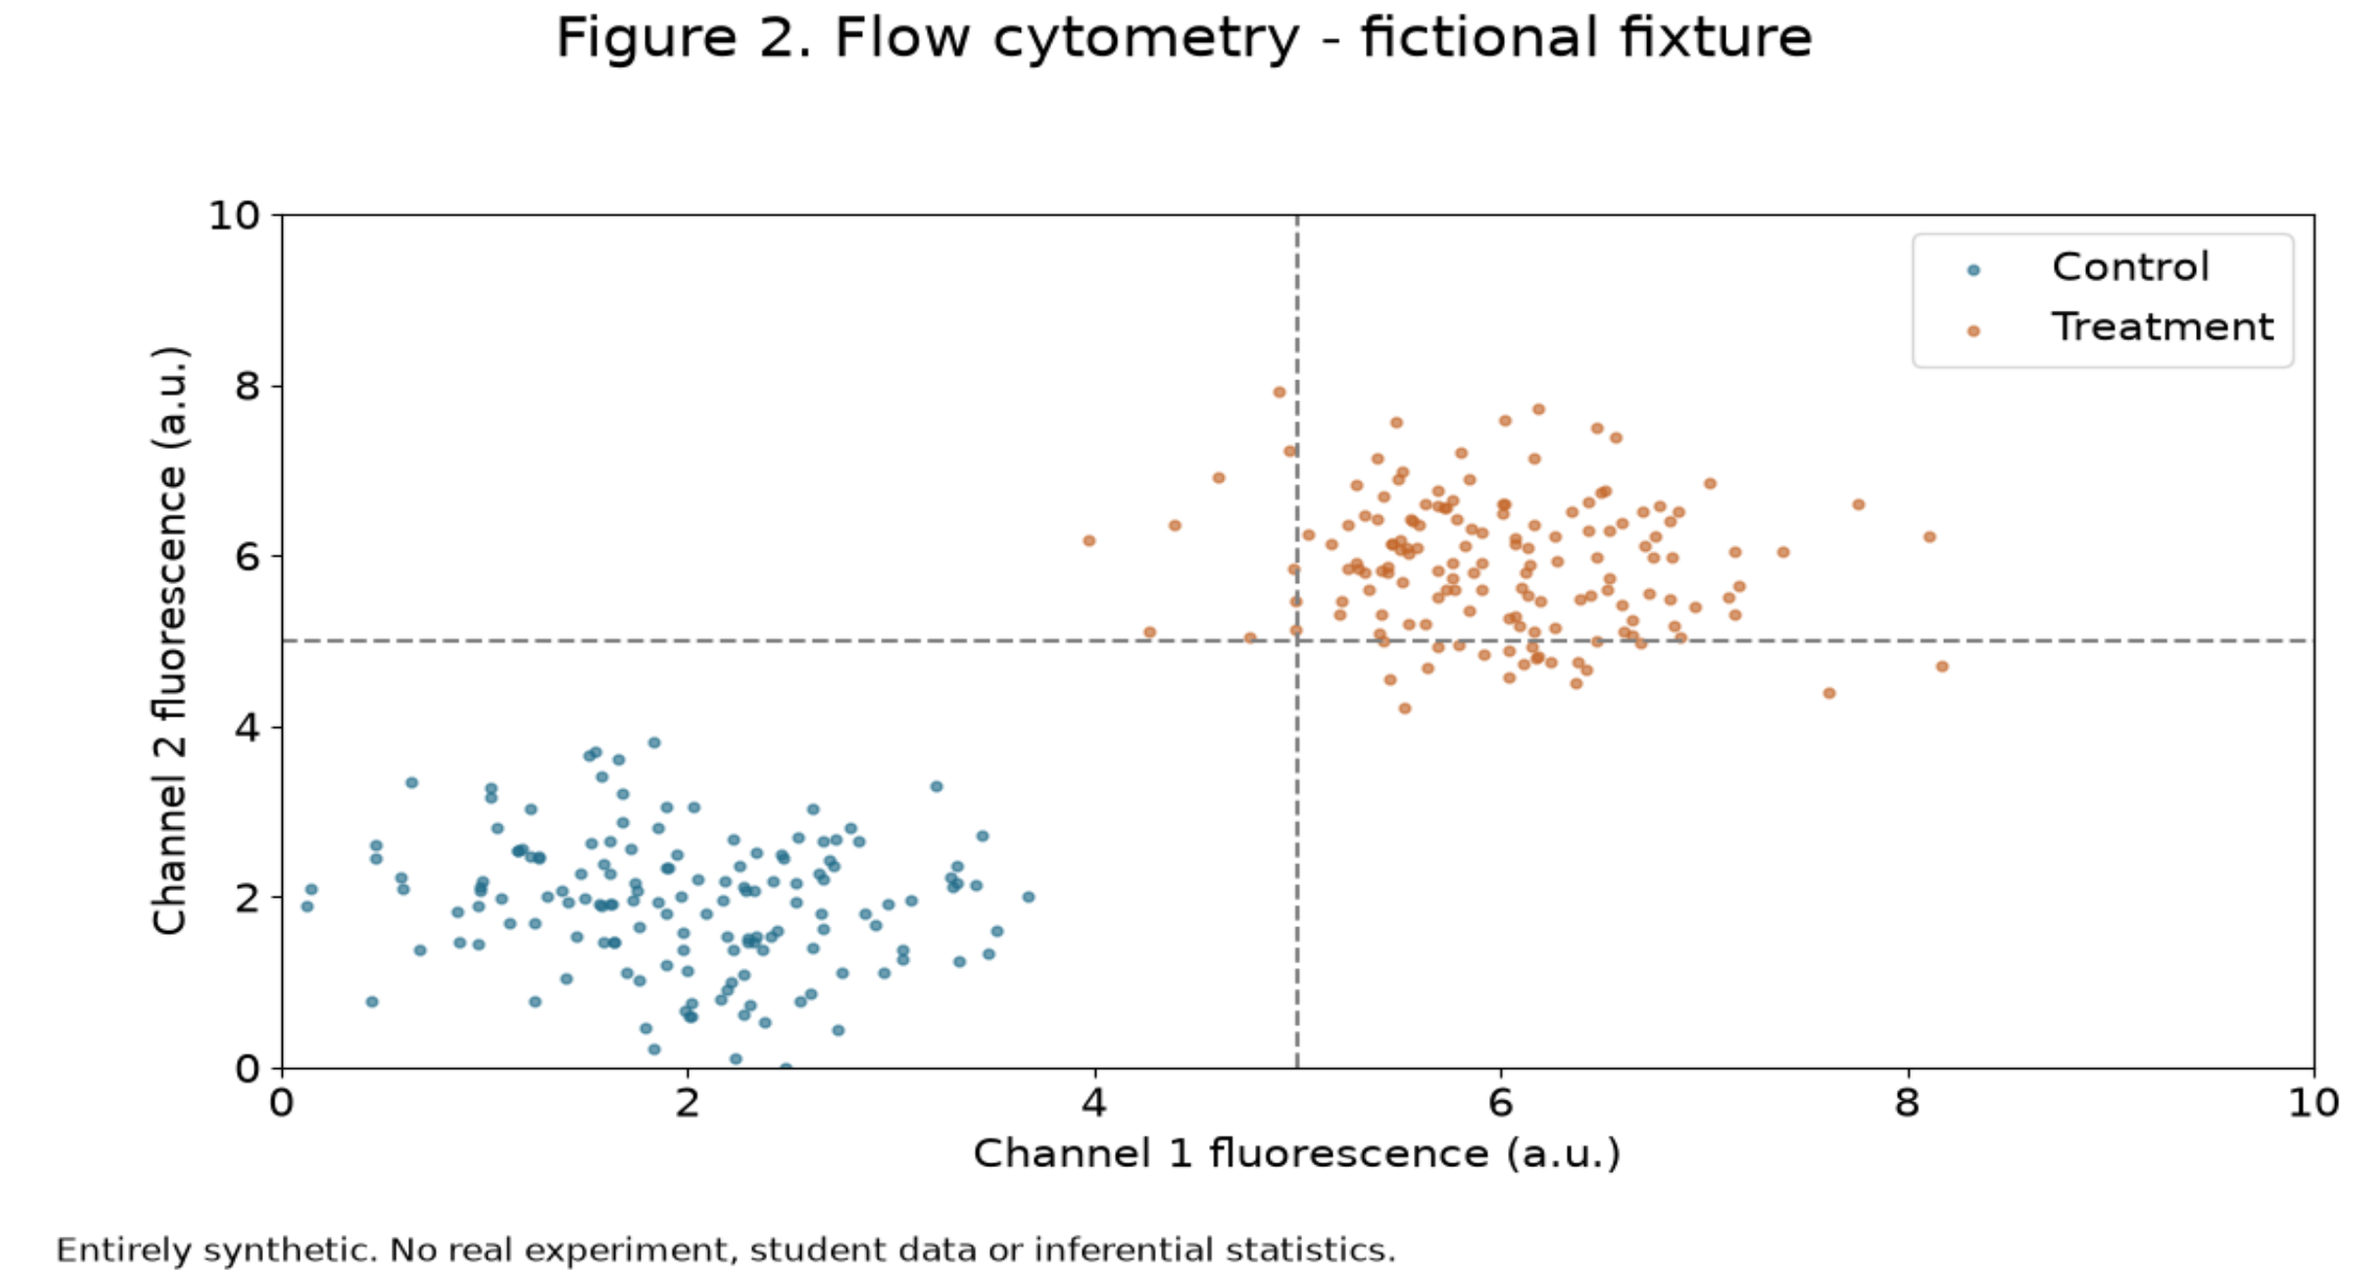

Figure 3. qPCR amplification

Control and treatment fluorescence by amplification cycle

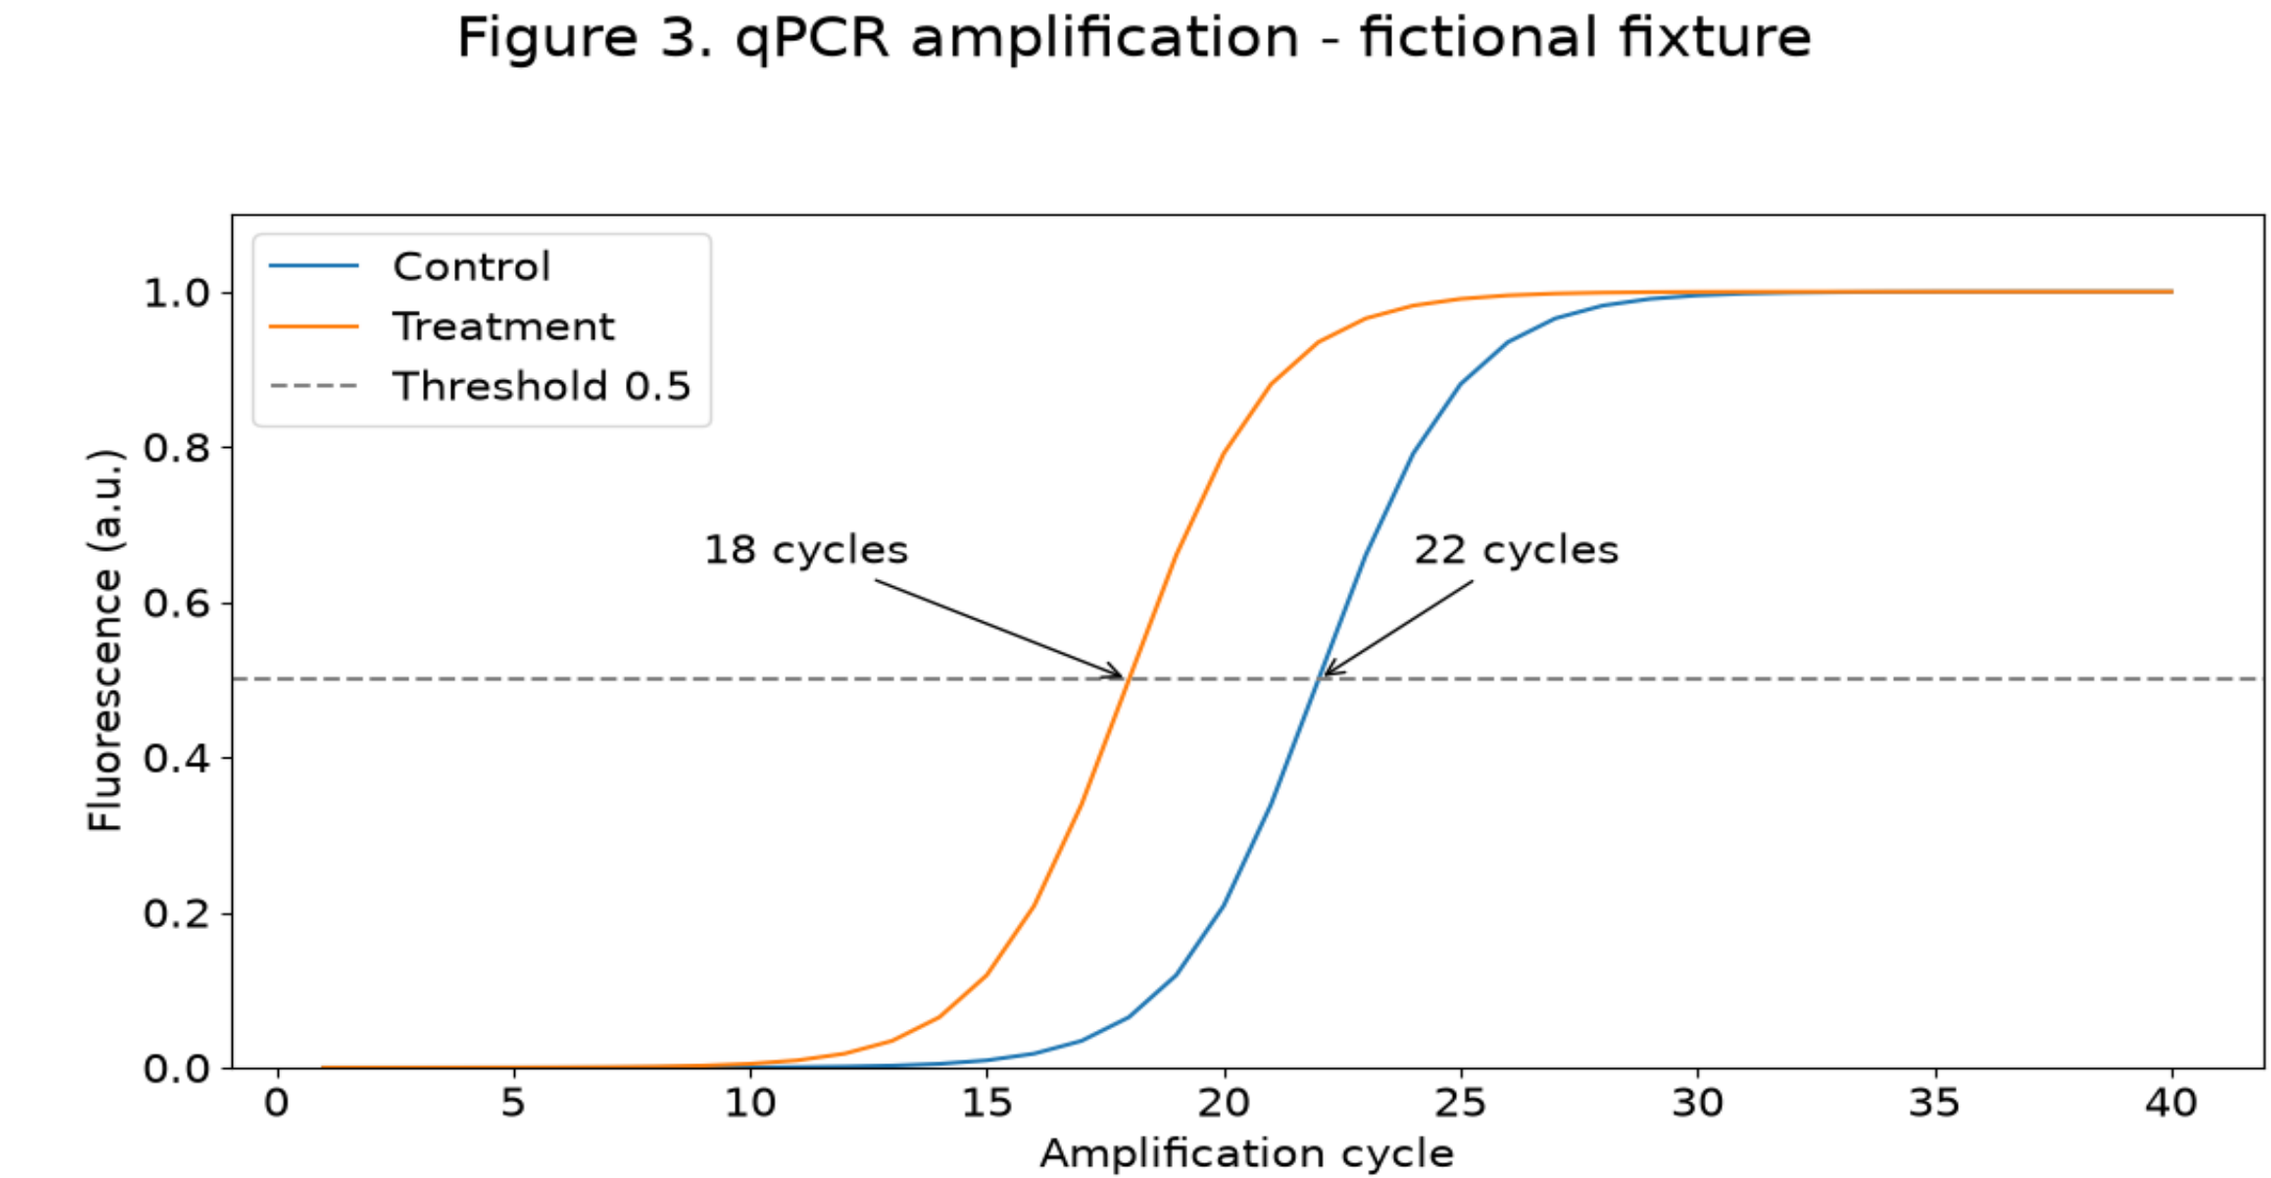

Figure 4. Mass spectrometry

Ion intensity across mass to charge ratios

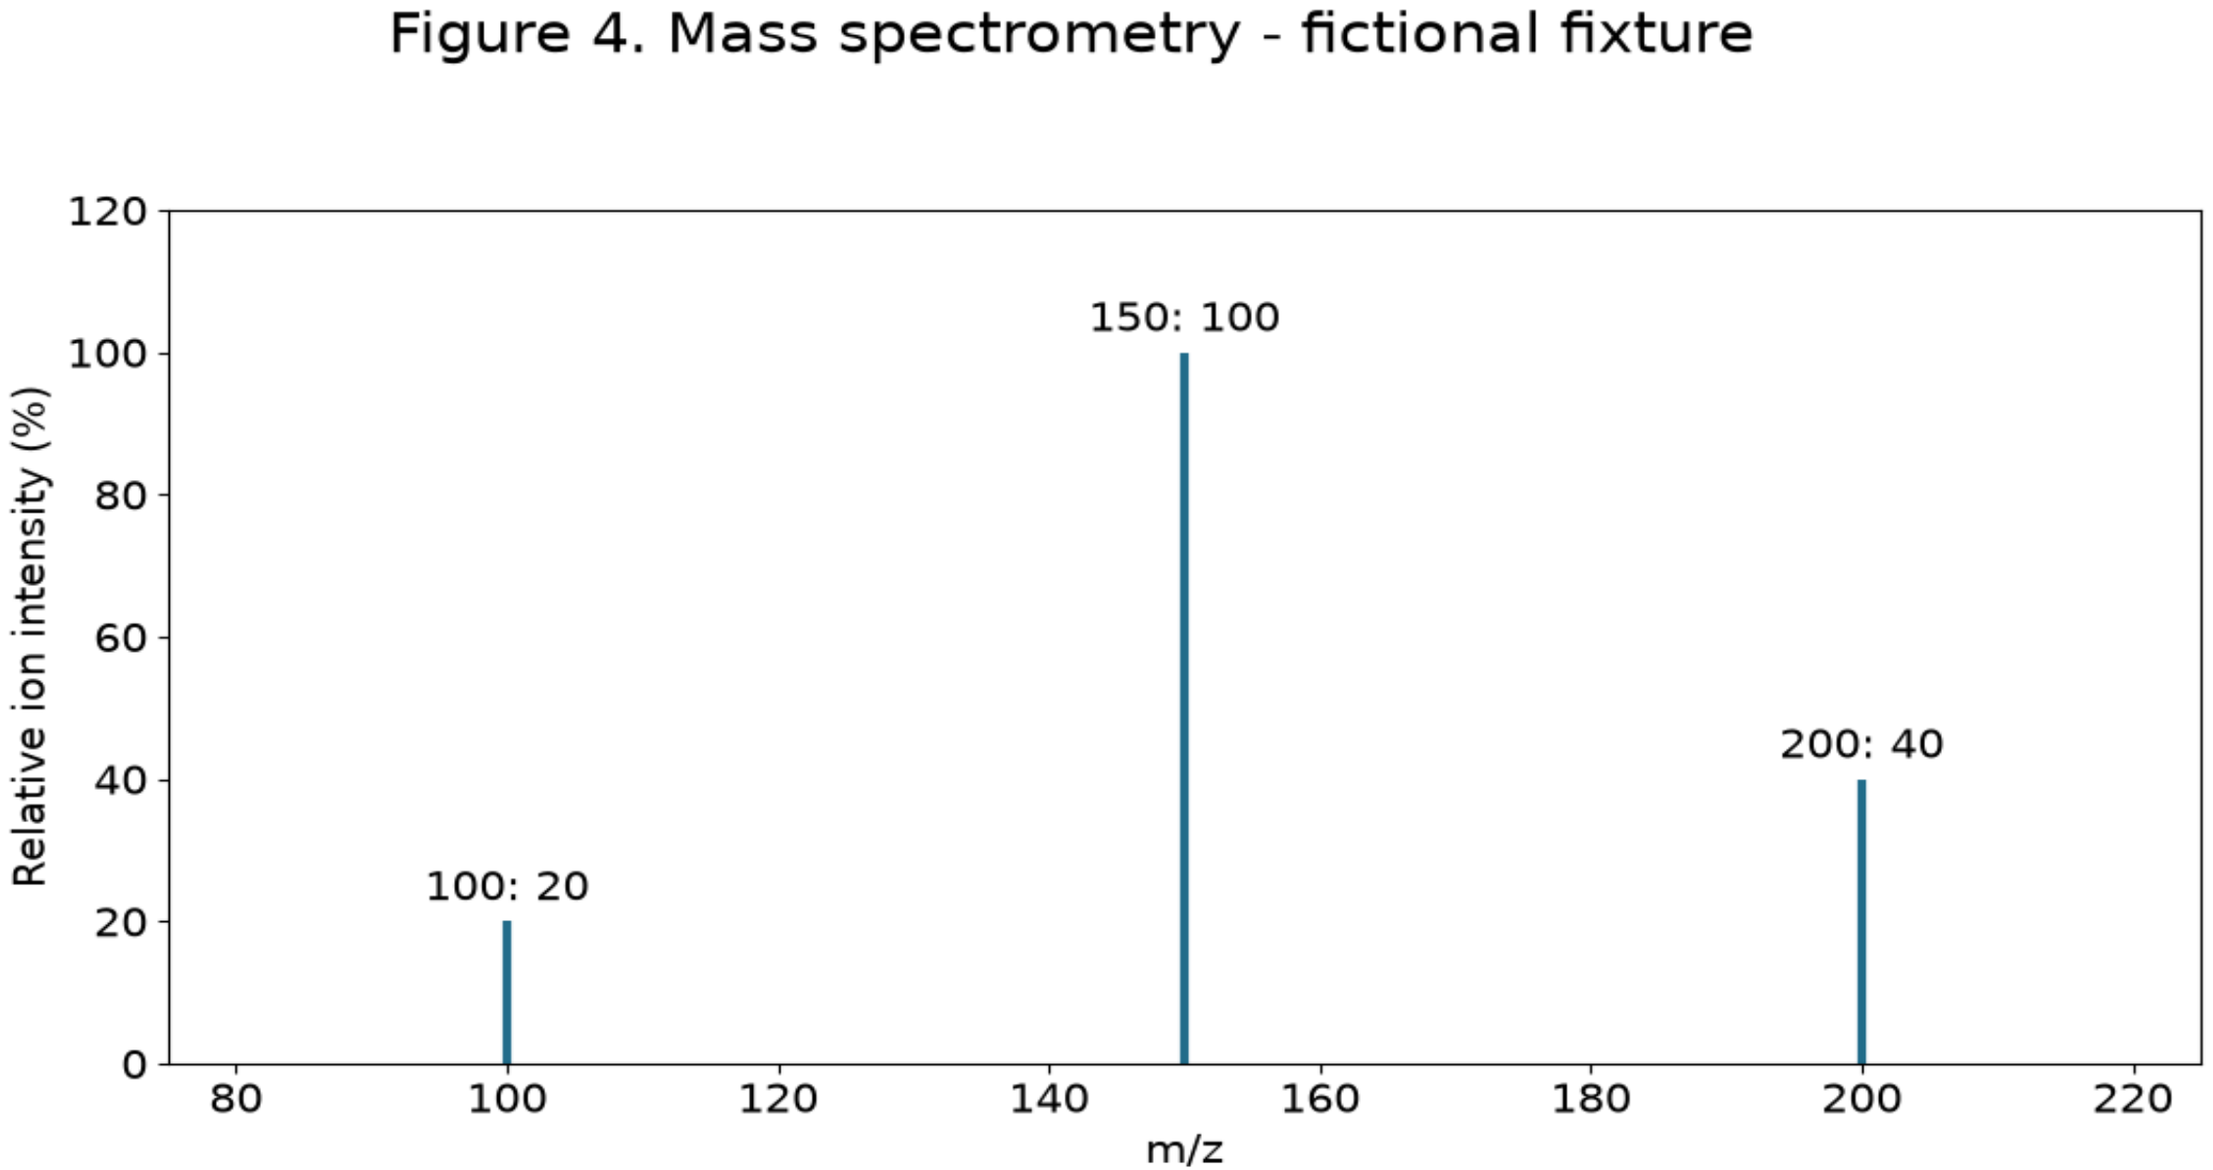

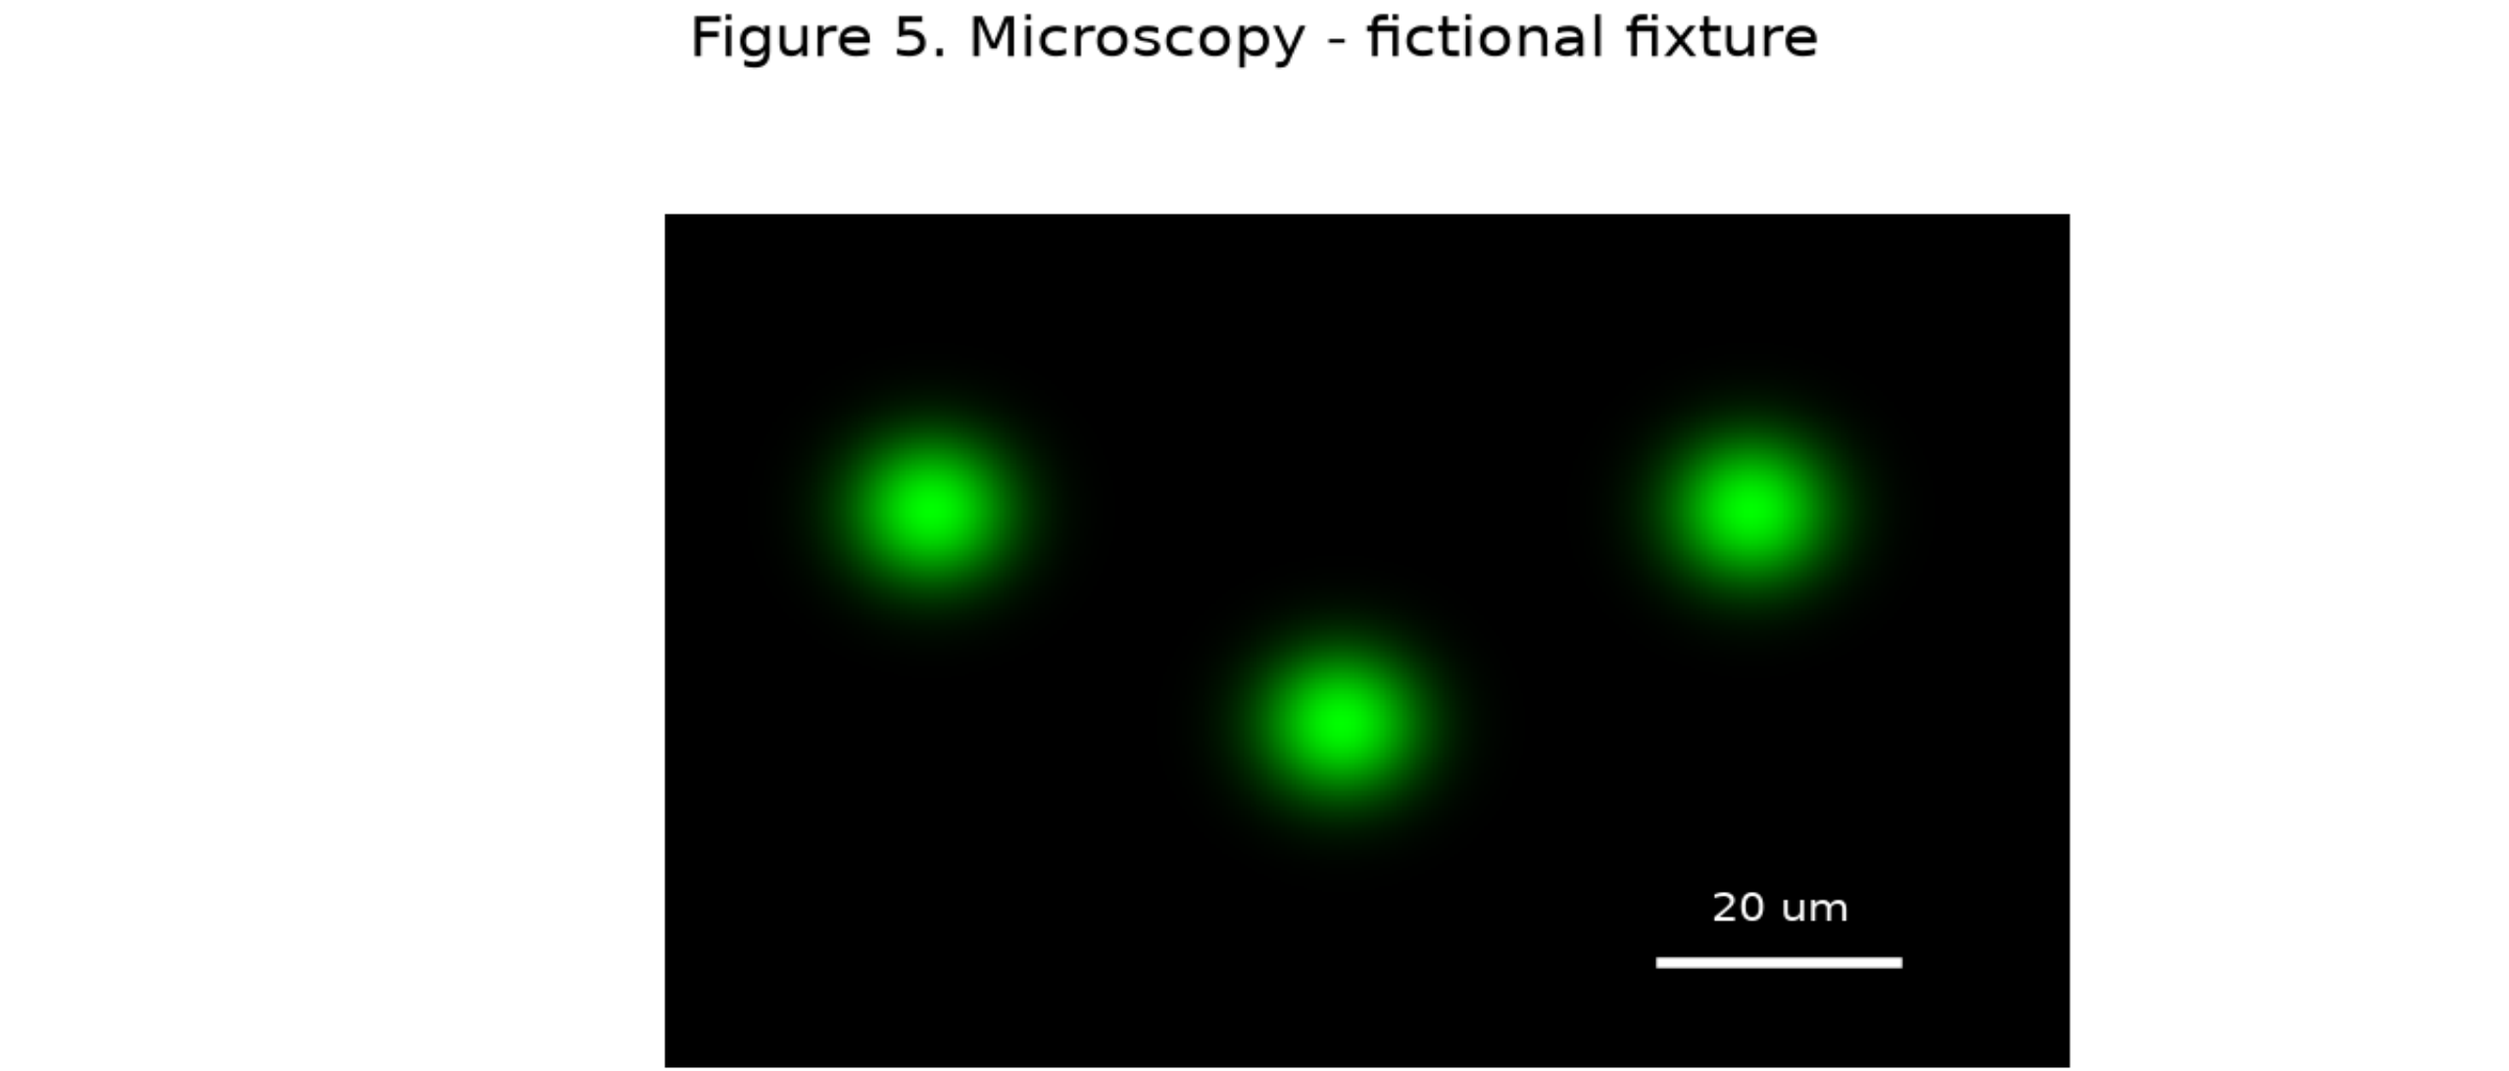

Figure 5. Microscopy

Synthetic cell fluorescence with a scale bar

Entirely synthetic. No real experiment, student data or inferential statistics.

Figure 6. Cell signaling

Proposed receptor kinase transcription mechanism

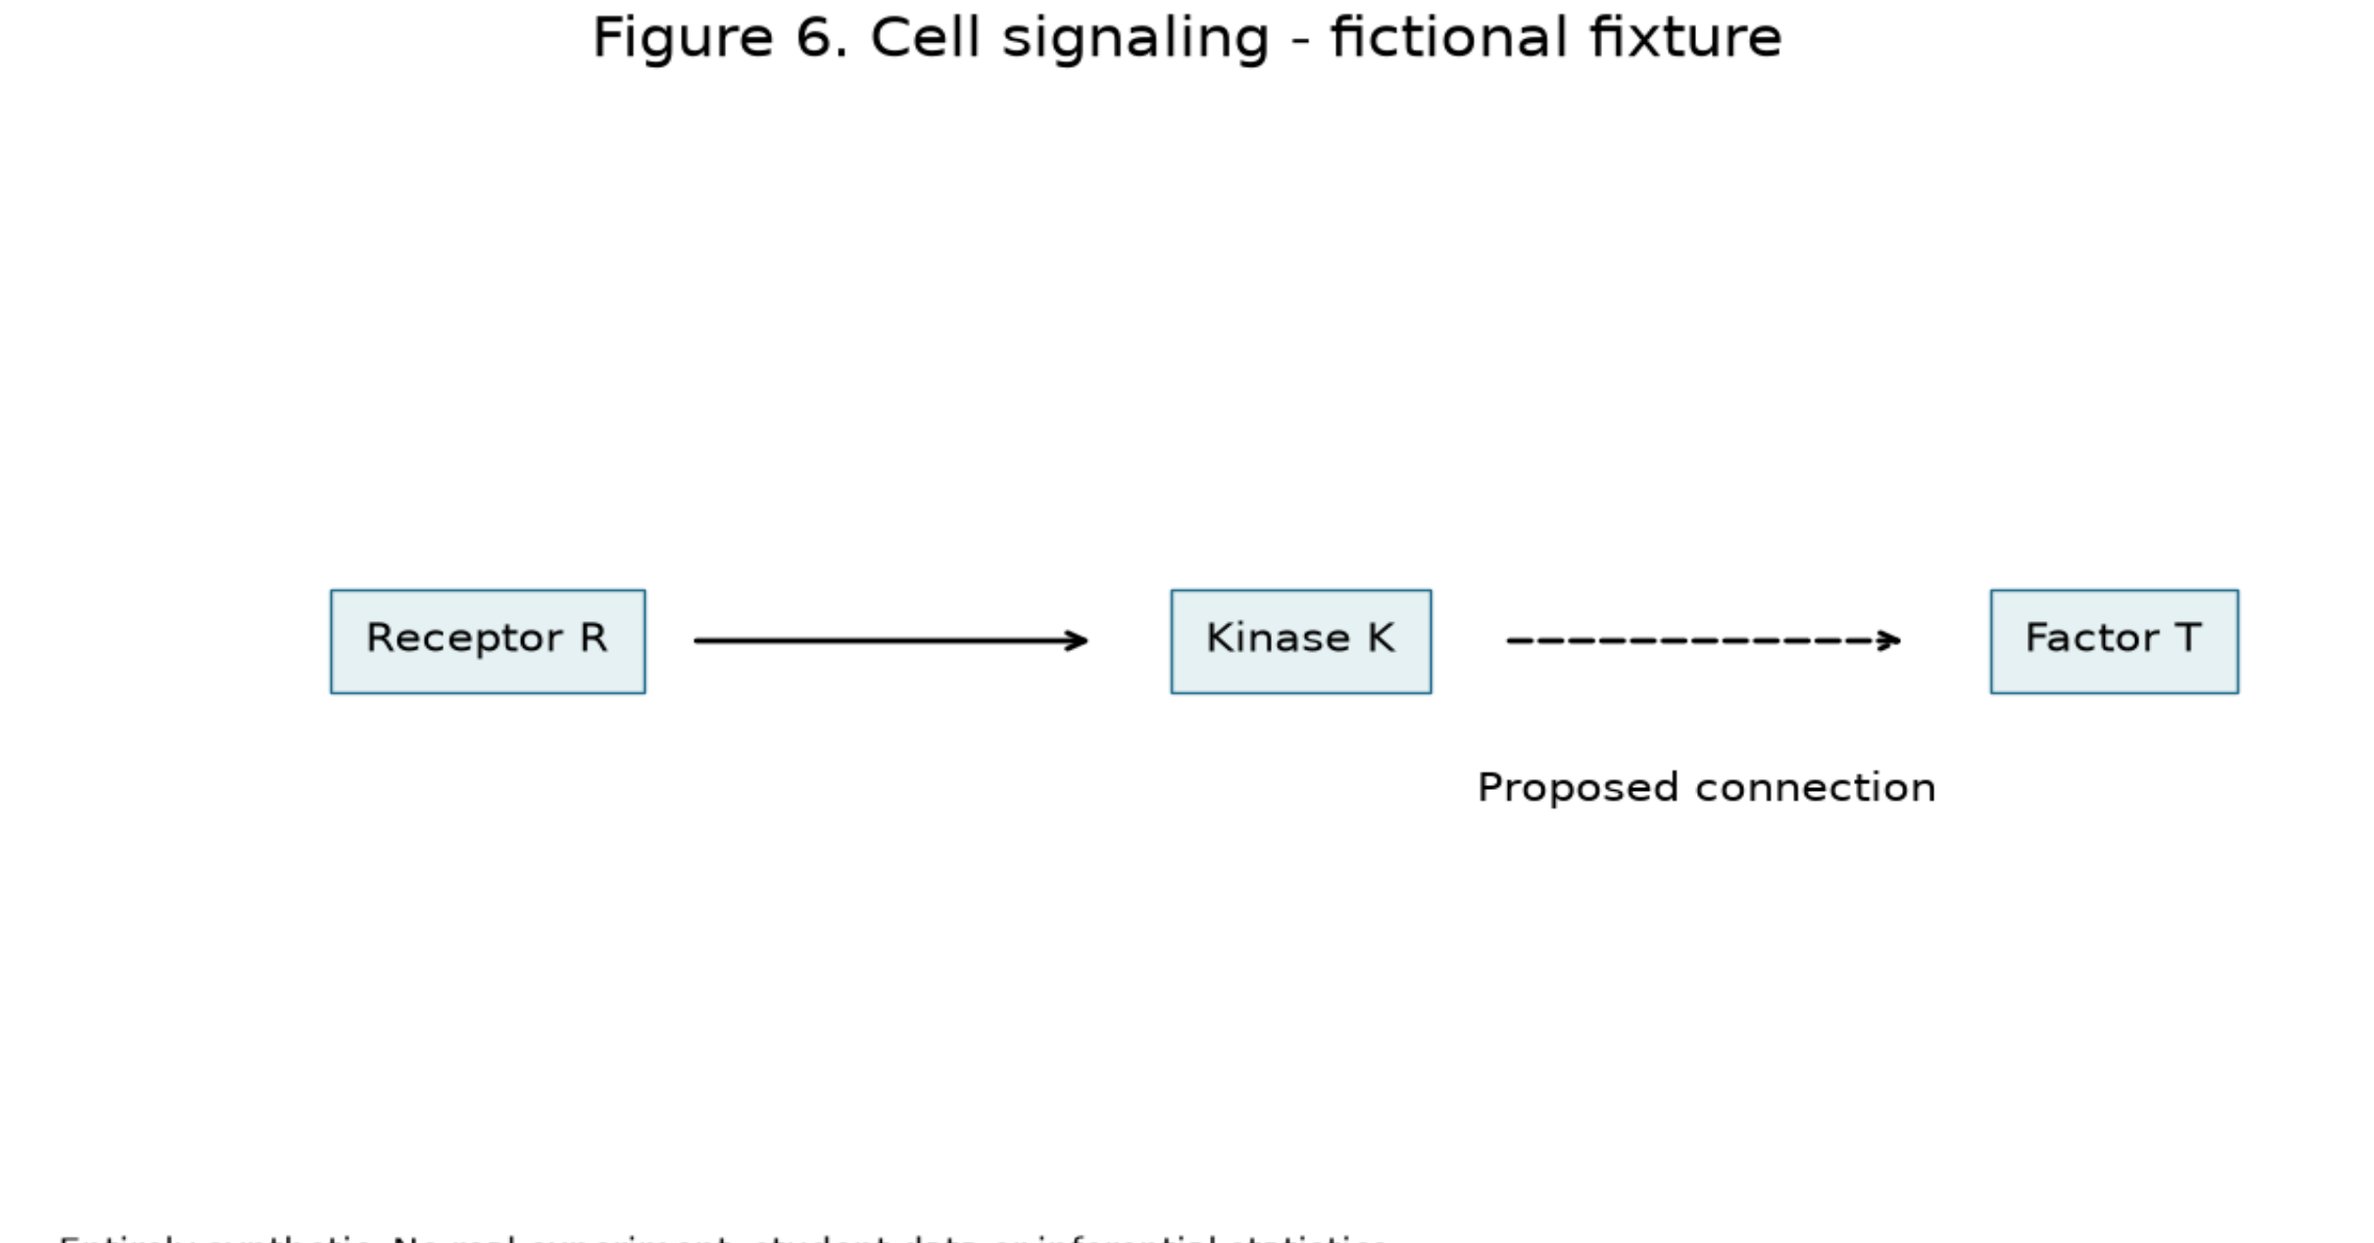

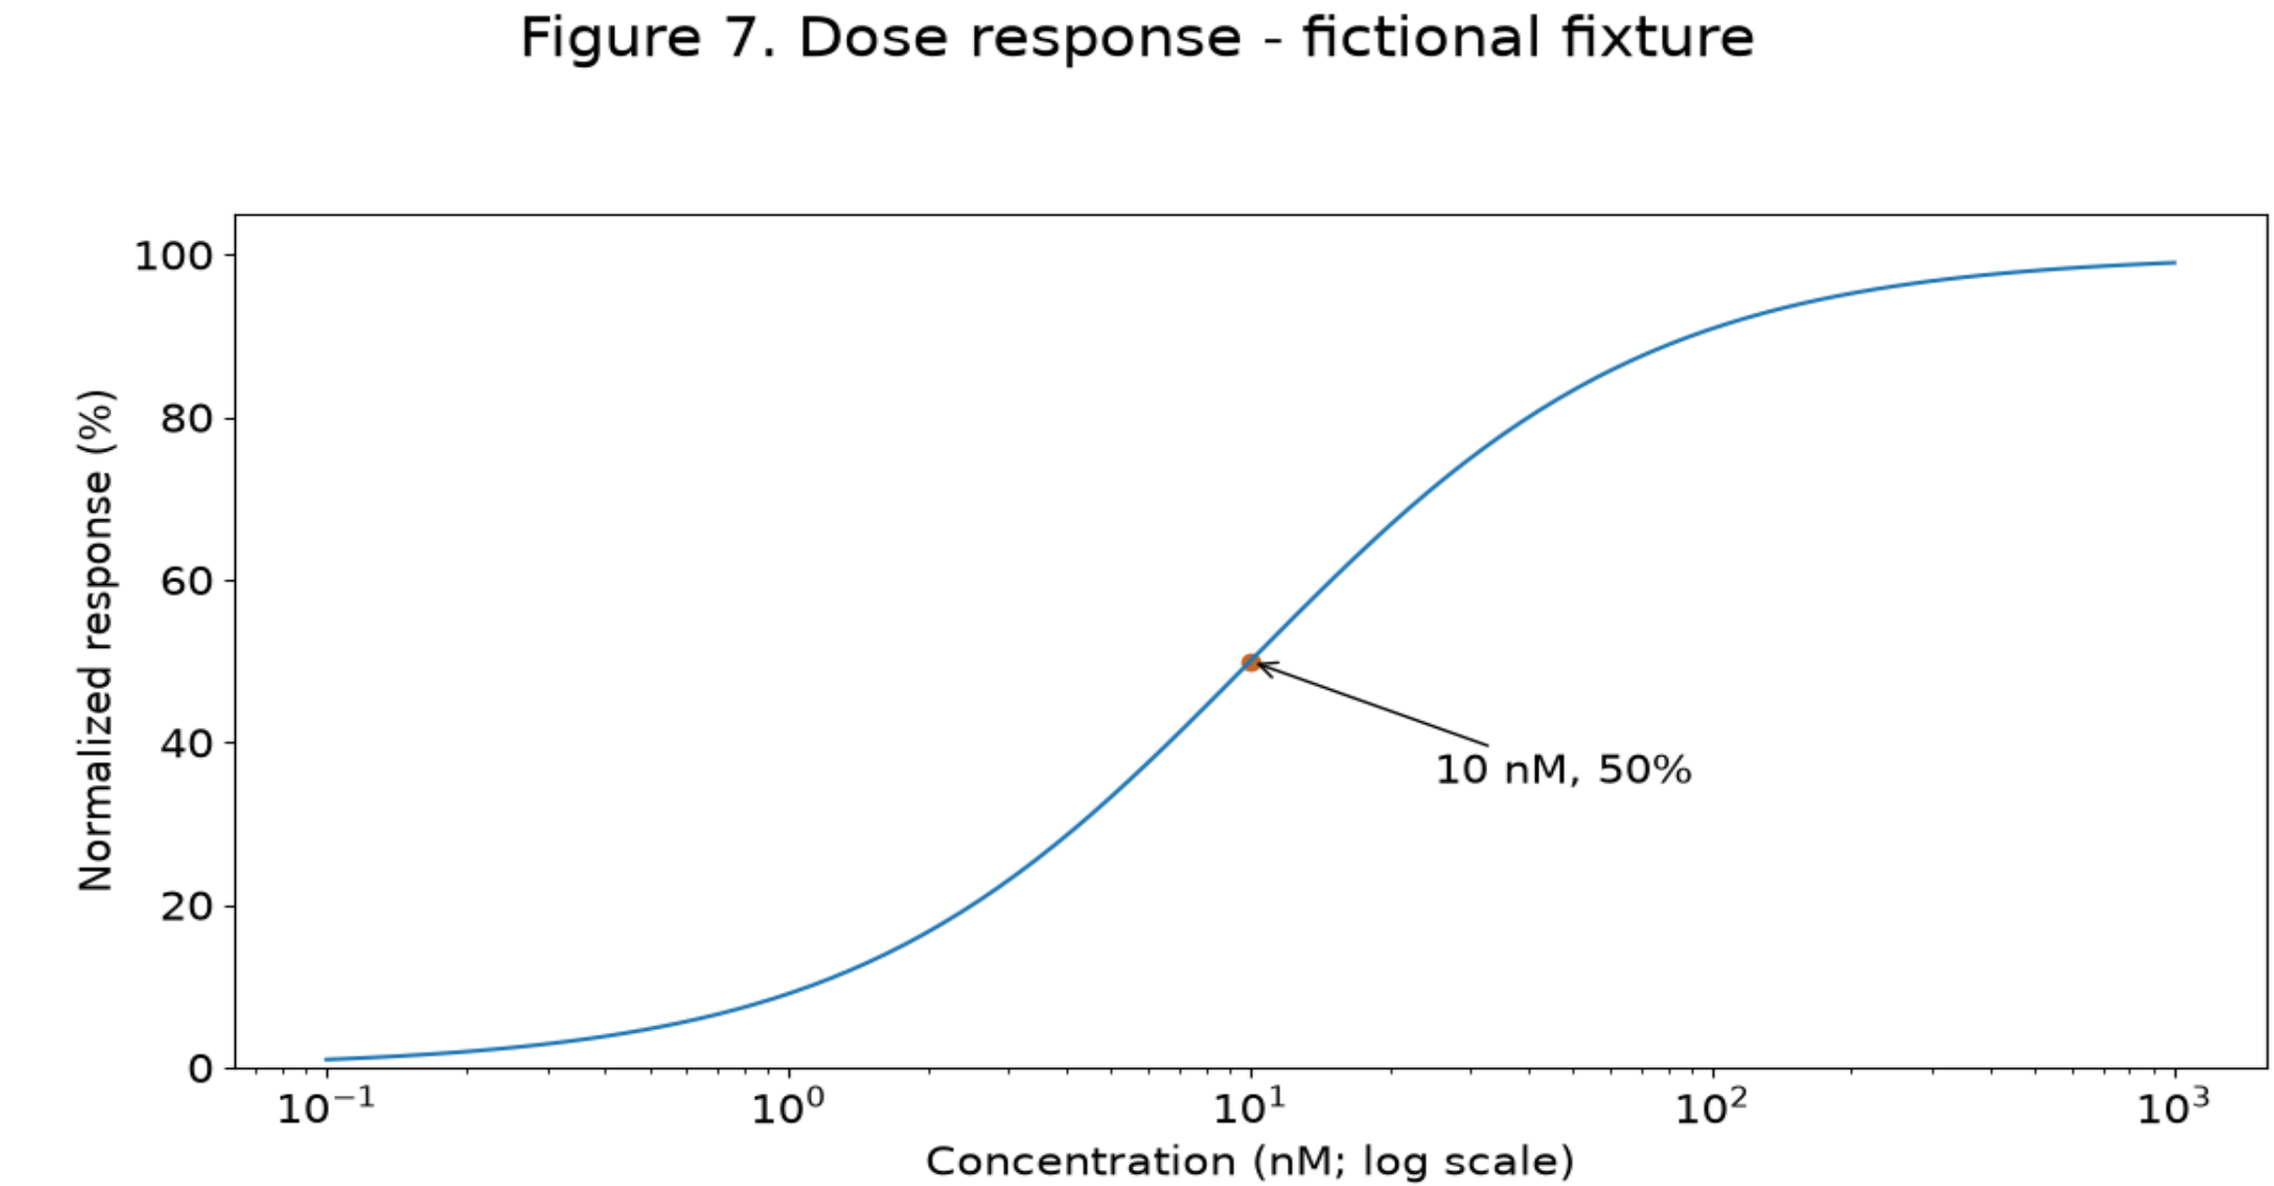

Figure 7. Dose response

Treatment concentration and normalized response

Entirely synthetic. No real experiment, student data or inferential statistics.

Figure 8. Confocal imaging

Red green channels and merged optical section

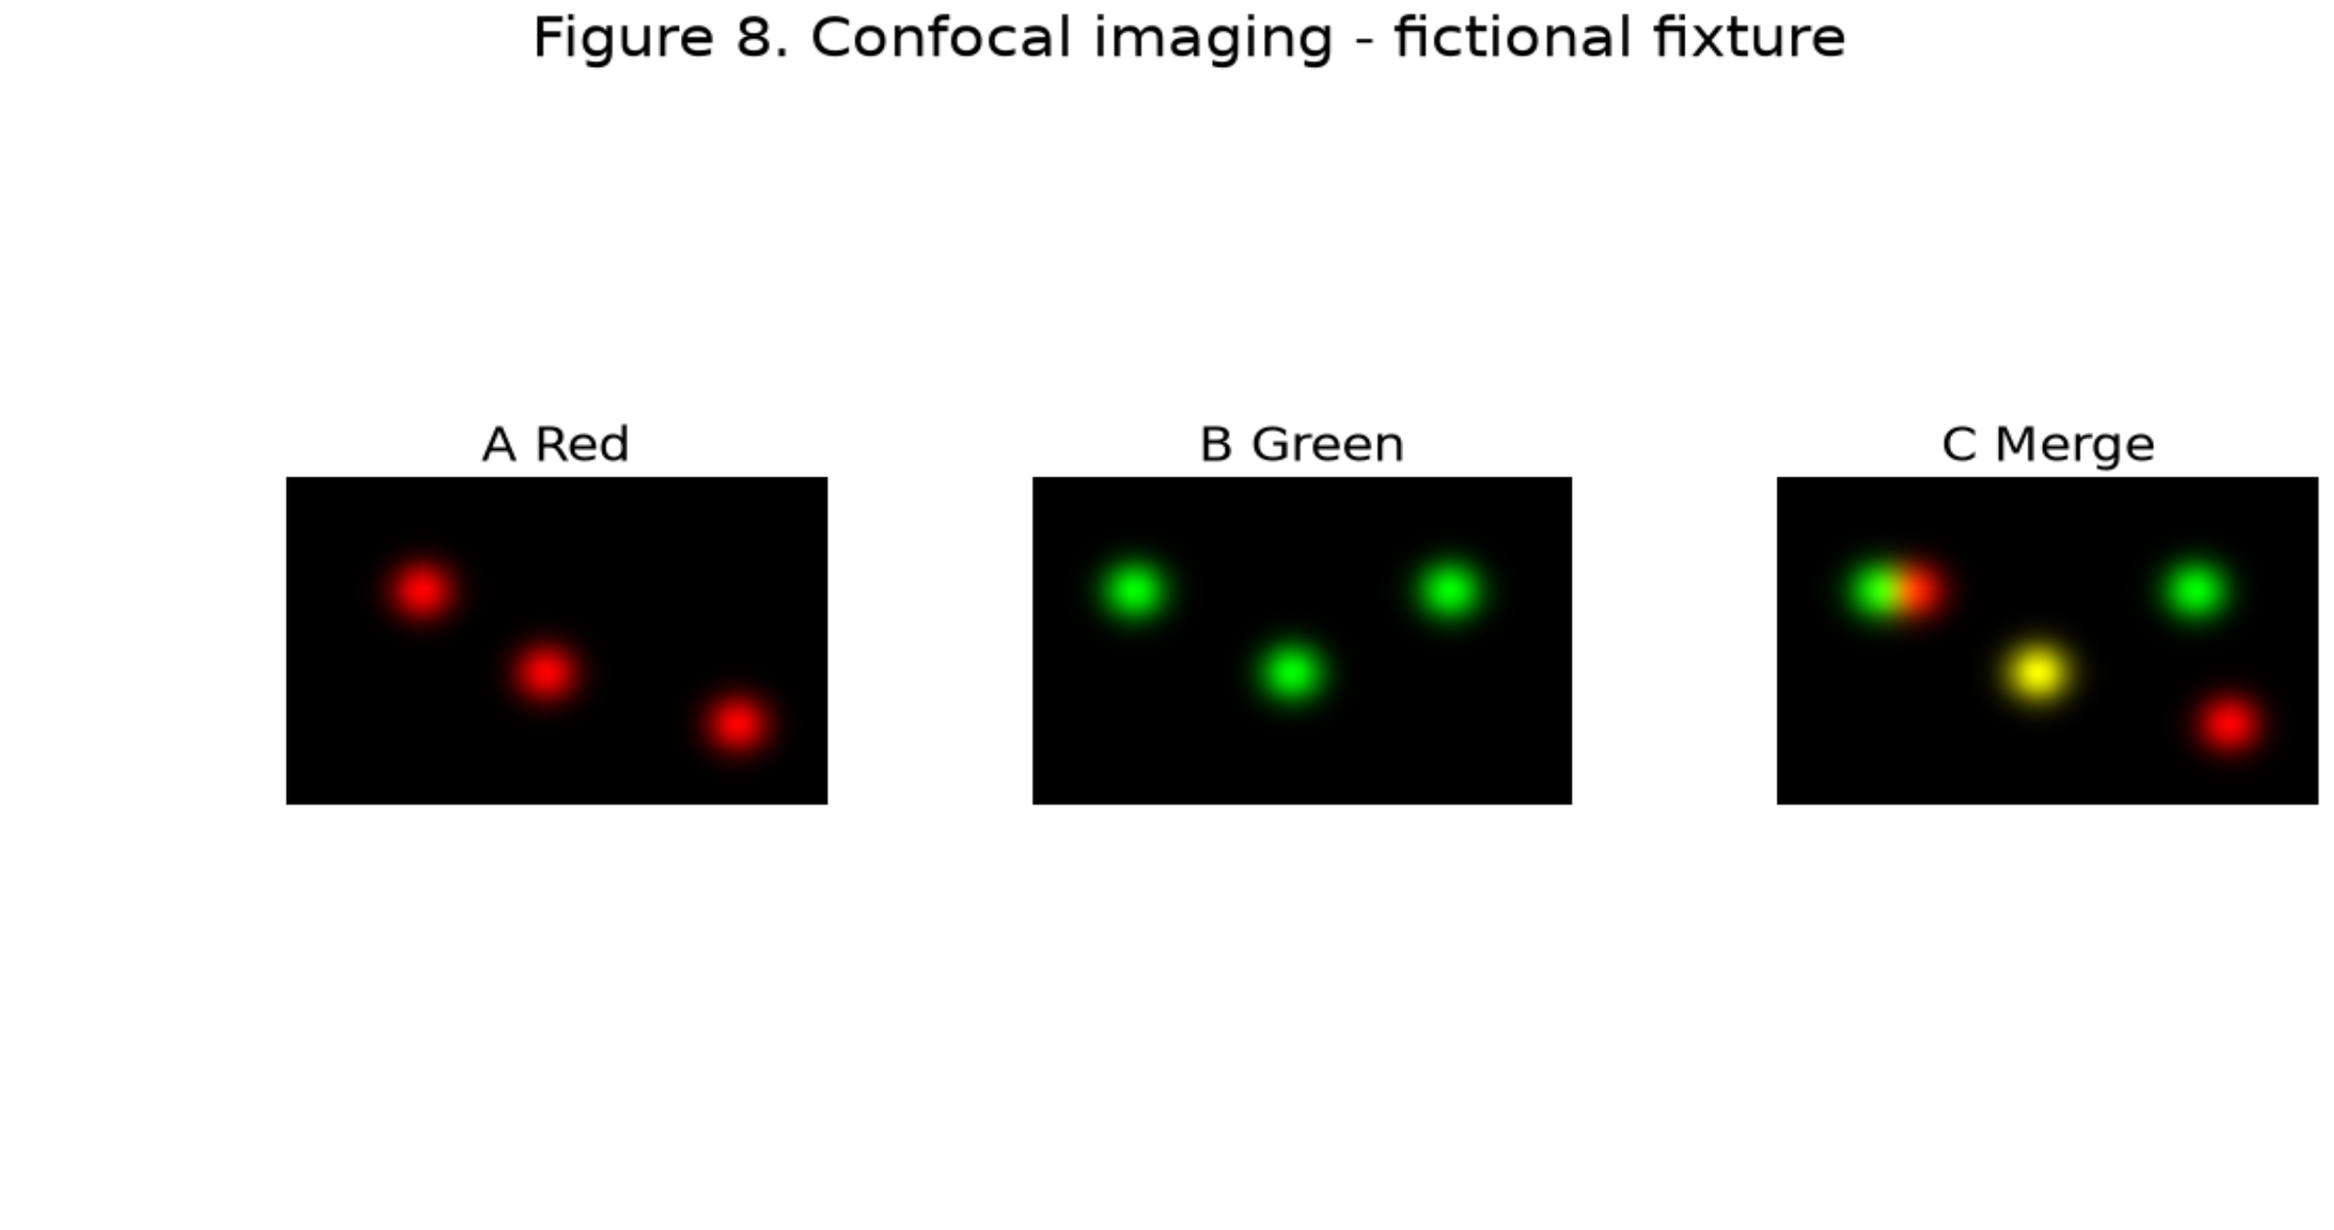

Figure 9. Multi-panel research figure

Different measurements across panels A and B

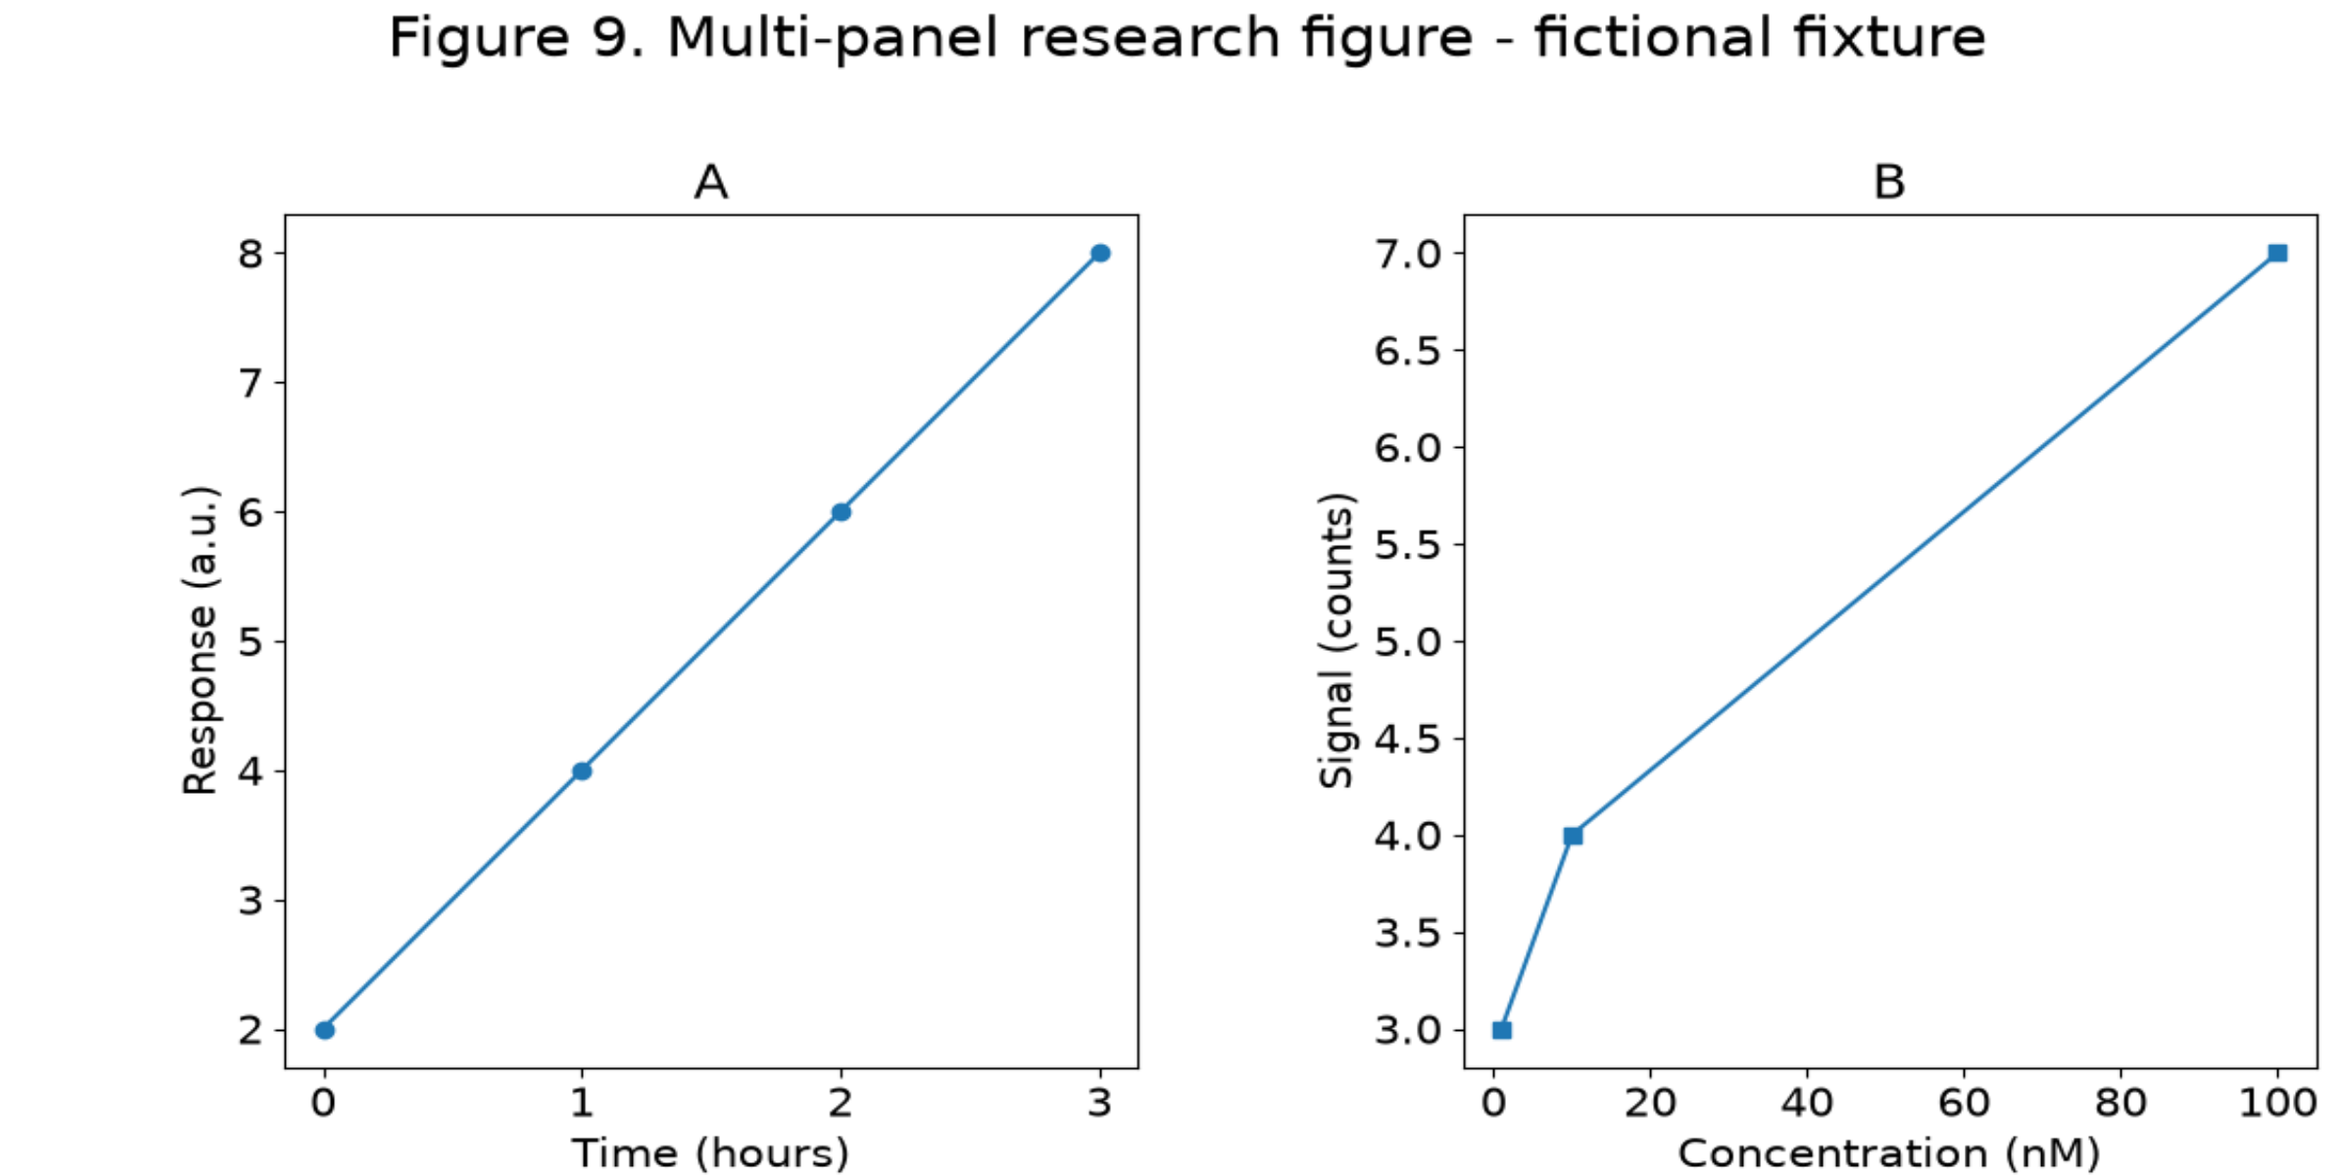

Figure 10. Complex table headers

Treatment replicates and units in merged headers

Figure 10. Complex table headers - fictional fixture

Condition	Concentration measurements	
	Replicate 1	Replicate 2
Control (uM)	1e-3	ND
Treatment (uM)	2e-3	3e-3

Entirely synthetic. No real experiment, student data or inferential statistics.
